Infrared/Trench Patching

Infrared Patching Benefits & Uses

- ◆ Repair pot holes and alligator cracked areas
- ◆ Repair trip hazards
- ◆ Restore service cuts
- ◆ Eliminate depressions or water holes
- ◆ Blend new blacktop without sawing
- ◆ Achieve smooth transition between blacktop and concrete joints
- ◆ Adjust pavement to manholes
- ◆ Lower high areas
- ◆ Repair deteriorated paving seams

Trench Patching Benefits & Uses

A trench patch is 2' x 11' and is typically used to repair:

- ◆ Areas the traditional patch does not fit
- ◆ Transverse joints on runways/taxiways
- ◆ Trip hazards: Creates smooth transition between concrete and asphalt.
- ◆ Utility cuts
- ◆ Speed bumps
- ◆ Garage aprons
